People, Safety & Quality Branch

Background

Long Term Care at Western Health

Long Term Care (LTC) provides quality institutionally based programs and services within three LTC homes, four Protective Community Residences and four Rural Health Centers. LTC staff work collaboratively with other branches of Western Health in the planning, delivery, and monitoring of LTC programs and services. An interdisciplinary, collaborative model of care is important for delivery of quality LTC programming. Nursing, Social Work, Physiotherapy, Occupational Therapy, Behavior Management, Physicians, Pharmacy, Therapeutic Recreation, and Spiritual Care are all integral parts of the interdisciplinary team within LTC programs and services. In 2020/2021, LTC developed a new Regional LTC Quality Improvement Team composed of residents, family members, clinical staff, and support staff from various LTC sites in the region. As part of Western Health's commitment to quality improvement for residents and their families, it is important to measure resident and family experience. The Quality Improvement Team reviewed and provided input on modifications to the LTC Resident and Family Experience Surveys. The Team, and LTC sites, will use the survey results to guide quality improvement initiatives.

Impact of COVID-19 Pandemic

The World Health Organization declared COVID-19 a global pandemic on March 11, 2021, the world faced profound economic and social impacts. Within Western Health, 2020/2021 was an exception year in many ways. The effects and implications of the pandemic affected all sites, services, and programs throughout the year. LTC residents, families and staff were impacted by many changes in staffing and safety protocols, resident and visitor screening practises, personal protective equipment, program delivery, and visitor restrictions.

Survey Instrument

The validated Consumer Assessment of Healthcare Providers and Systems (CAHPS) Nursing Home Survey: Resident Instrument, developed by Alberta Health Services, was utilized as the basis for the survey administered to LTC residents throughout the Western region. Based on experiences using this survey within Western Health in 2010 and administering a modified version in 2013 and 2015/16, this survey tool was modified in collaboration with the Regional LTC Quality Improvement Team. Questions were modified to fit with current language and terminology for services and providers, to ask about additional services and providers, as well as to help assess the impact of the COVID-19 pandemic on resident experience. This modified tool (Appendix A) was used to evaluate resident experiences and administered electronically through the Get Feedback online survey platform.

Method

The LTC Resident Experience Surveys were administered face-to-face from May 3 to June 25, 2021. Due to visitor restrictions, volunteers were not able to be utilized for survey administration. However, sites used a combination of staff, students, and nurses on ease-back to administer and transcribe the surveys. Western Health promoted the LTC Resident Experience Survey broadly on the organization's website and social media pages. The Resident Survey was also promoted to families, who were encouraged to assist their family members with completion, if preferred.

Participants

The health care team for each LTC facility/floor throughout Western Health determined which LTC residents were able to complete the survey. A list of residents able to complete the survey was compiled by each team and provided to those responsible for administering the survey. All residents listed were given the opportunity to participate.

Sample

Surveys were administered to 150 resident participants regionally. For Corner Brook Long Term Care (CBLTC), 55 residents completed the survey. The total occupancy for CBLTC was 236 at the time of the survey and 98% of those identified as able to complete participated. This sample size provides a confidence level of 90% that the real values are within $\pm 10\%$ of the measured values.

Privacy, Confidentiality, and Data Security

Privacy and confidentiality were achieved as the residents names were not reported on the surveys. The electronic survey reports are stored in a password-protected account on the Get Feedback online platform. Any information that could potentially identify the residents was deleted. All downloaded data was stored on a password protected computer in the Monaghan Hall office used by Quality staff.

Data Analysis

Survey data was entered directly into Get Feedback by the respondent or transcribed from paper copies by the survey administrators. Reports were developed and analyzed in this survey platform. Descriptive statistics were calculated to obtain a general perspective of residents' experiences with LTC services at Western Health. The not applicable and I don't know/I am unsure responses were removed from calculations to provide a more accurate representation of the measures. Comments were compiled based on common themes. Statistics were also filtered for each site or grouping of sites where the sample provided sufficient data to assist in quality improvement initiatives. Comparisons to the 2016 results must consider that the 2021 residents are not the same individuals who were residing in LTC in 2016. The following report provides survey results for CBLTC.

Results

Demographics

A total of 55 surveys were completed by residents in CBLTC, an increase from 39 participants in the 2016 survey. To gain a more thorough understanding of the demographics of the LTC residents, respondents were asked for their age, gender, race or ethnicity, and whether they had difficulty with the English language. Of the respondents, 11% were 95+, 41% were 85-94, 24% were 75-84, 17% were 65-74, 4% were 55-64, and 4% were 45-54. Females accounted for 67% of the respondents and males for 33%. The majority of the respondents identified as White/Caucasian (95%) and 5% identified as Indigenous/Aboriginal. Of the respondents, no one (0%) reported having difficulty with the English language.

Residents were also asked about highest level of school completed, whether they had a roommate, and if they had help with survey completion. Of the respondents, 53% reported having grade school or some high school, 20% reported having completed high school or having a GED, 11% reported having post-secondary technical school, 5% reported having some university or college, 2% reported completing a college diploma, and 9% had completed a university degree. Only 7% of respondents had a roommate. When asked about support with survey completion, all of the respondents (100%) had assistance, with the most common assistance being 'read the questions to me' (96%) and 'recorded the answers I gave' (93%).

Meals

Residents were asked to rate food and dining experience on a scale of 0-10 (with 10 being the best possible). On average, respondents rated meal quality at 7.31, an increase from 7.09 in 2016. Food taste was rated 6.84 and food temperature was rated 6.53. Several residents also provided comments that the food was cold. When asked how the pandemic has impacted their satisfaction with the meals provided, 94% of respondents reported no change and 6% reported being somewhat less satisfied.

Those who eat in the dining room (or communal area), were asked how they would rate their mealtime enjoyment. The average rating was 8.06, a decline from 8.90 from 2016. When asked how the pandemic has impacted their satisfaction with the mealtime experience (such as the dining room), 91% of respondents reported no change, no one (0%) reported being somewhat or significantly more satisfied, 7% reported being somewhat less satisfied, and 2% reported being significantly less satisfied. Several residents commented that they missed eating with others in the dining room.

Environment

Respondents were asked to rate the home in relation to temperature and cleanliness. On average, respondents rated the temperature at 7.36 (range 0-10), a decrease from a rating of 8.18 in 2016. On average, respondents rated cleanliness at 9.13, a decrease from 9.61 in 2016. When asked how the pandemic has impacted their satisfaction with the cleanliness of the LTC home, 72% of respondents reported no change, 15% reported being somewhat more satisfied, 11% reported they were significantly more satisfied, no one (0%) reported being somewhat less satisfied, and 1% reported being significantly less satisfied.

Respondents were asked to indicate whether the area around their room was quiet at night and 85% reported yes, 7% reported no, and 7% reported sometimes. The majority of respondents reported that they were not bothered by noise during the day (75%), while 9% reported that they were and 16% reported sometimes. Privacy is also an important component of environment. When respondents were asked if they could find a place to visit in private if they had a visitor, 96% reported yes and 4% reported no. Respondents were also asked to indicate how safe and secure they felt in the home, and on average respondents reported 8.38, which is a decrease from 9.79 in 2016.

Medication

When asked if they take any medicine (prescribed or Aspirin/Tylenol) to help with aches or pain, 62% of respondents indicated that they took some medication, while 24% said they did not and 15% were not sure. Those who indicated using pain medication rated the medicine at 8.24 (range 0-10) in how well it worked to help with aches or pain. This was a decrease from a rating of 8.93 in 2016. On average, respondents rated how well staff helped them when they had pain at 8.71 (range 0-10), a decrease from 9.31 in 2016.

Resident Care

Residents were asked to indicate the rating they would give for the overall care they receive from all the LTC staff. Respondents rated overall care as 8.6 out of 10. This is a decrease in satisfaction from a rating of 9.55 in 2016. When asked how the pandemic has impacted their satisfaction with their overall care, 89% of respondents reported no change, no one (0%) reported somewhat more satisfied, 2% reported they were significantly more satisfied, 9% reported somewhat less satisfied, and no one (0%) reported being significantly less satisfied.

Residents were asked to indicate if they get the care they need in the LTC home. The majority (78%) reported yes, 16% reported sometimes, and 5% reported no. Eighty nine percent of respondents reported that staff helped them to dress, bathe, shower, or go to the toilet. Residents were also asked if they sometimes needed help from staff to stay clean. Of the respondents, 91% reported yes, 2% reported sometimes, and 7% reported no.

Respondents who needed help were asked if they received the help they needed to stay clean and the majority (88%) reported yes, while 11% reported sometimes and no one (0%) reported no. This is an increase from 2016, when 76.9% of respondents reported that they received the help they needed, 5.1% reported sometimes, and 15.4% did not report. When respondents were asked whether they were left sitting or lying in the same position for so long it hurt, 15% of respondents reported yes, 15% reported sometimes and 71% reported no.

Respondents were also asked to indicate if the staff made sure they had enough personal privacy when they dressed, showered, or bathed and 96% indicated yes, while 4% indicated sometimes.

Several rating questions were asked about the care residents received in relation to gentleness, respect, listening, and explaining things in a way the residents could understand (see Table 1). While there were decreases in all ratings from 2016, most aspects of care continued to receive high ratings.

Table 1. Resident Care (Range 0-10; 10 being best possible)

Aspect	2016	2021
Gentleness of staff	9.56	8.16
Respectfulness of staff	9.53	8.44
Staff listen	8.87	7.71
Staff explain things in a way that is easy to understand	9.20	7.82
Overall rating of care from all staff	9.55	8.60

Respondents were asked to indicate how often they were satisfied with the care they received from each of the programs/disciplines providing care (Table 2). Not applicable ratings were removed to indicate satisfaction of those who had experience with each service. While respondents reported some levels of dissatisfaction with each service, the majority reported being usually or always satisfied with each service.

Table 2. Resident Satisfaction with Services (% of respondents; not applicable removed)

Program/Discipline	Never	Sometimes	Usually	Always
Nursing Staff	4%	20%	24%	53%
Nurse Practitioner/Doctor	2%	20%	23%	54%
Occupational Therapy	10%	4%	14%	72%
Physiotherapy	10%	3%	17%	69%
Recreation Therapy	0%	25%	9%	66%
Social Work	5%	16%	22%	55%
Spiritual Care	6%	18%	6%	70%

When asked how the pandemic has impacted their satisfaction with access to health care staff, 83% reported no change, 6% reported being somewhat less satisfied, 2% reported being significantly less satisfied, 2% reported being somewhat more satisfied, and no one (0%) reported they were significantly more satisfied. When asked how the pandemic has impacted their satisfaction with access to programs and treatments, 89% reported no change, 7% reported being somewhat less satisfied, 4% reported being significantly less satisfied, and no one (0%) reported being somewhat or significantly more satisfied.

Respondents were asked if they visited a doctor or nurse practitioner for medical care outside the LTC home and 11% reported yes and 16% reported sometimes. Respondents were also asked about visiting a doctor or nurse practitioner inside the LTC home and 64% reported yes, 20% reported sometimes, and 16% reported no. When asked if a doctor or nurse practitioner was available when they need one, 76% of respondents reported yes, 20% reported sometimes and 4% reported no.

Residents' comments ranged from praise for high quality care to concerns about staff sometimes being rushed or not responding to requests for assistance. One theme in the residents comments centered on resident happiness and receiving excellent care. Several residents commented on being happy and enjoying living in CBLTC and others commented that they received excellent care or that everyone was good to them. In contrast, another common theme from residents' comments centered on the need for additional support, including needing more staff, needing to be checked on more often, and waiting too long for response to buzzers and requests for help.

Activities and Visitation

When asked if they were satisfied with how they spent their time in the LTC home, the majority of respondents (72%) reported yes, 13% reported sometimes, and 15% reported no. When asked how the pandemic has impacted their satisfaction with their access to activities, 87% of respondents reported no change, 6% reported being somewhat less

satisfied, 7% reported being significantly less satisfied, and no one (0%) reported they were somewhat or significantly more satisfied.

Residents were asked if the visitor restrictions put in place during the last six months had changed their in-person visits with their loved ones. Sixty four percent of residents indicated no change, while 33% indicated some or significant decrease and 4% indicated some increase. To further understand the impact of the pandemic-related visitor restrictions, residents were asked if they had enough in-person visits to meet their needs. The majority of residents (75%) reported that they did have enough visits to meet their needs, while 13% reported no, 7% reported sometimes, and 5% reported that they did not have in-person visits. A common theme in residents' comments centered on waiting to have more visitors and less visitor restrictions. A couple of individuals also specifically commented on wanting more access to music, including listening to music and participating singing activities.

Residents were asked about frequency, purpose, and satisfaction with virtual visits, which were defined as talking on the phone or having video calls (Face Time, Google Duo, etc.). Of the respondents, 44% reporting having virtual visits. Of those who had virtual visits, 29% reported daily visits, 8% reported several times per week, 21% reported weekly, 21% reported having visits several times per month, and 21% monthly or less. When those who had virtual visits were asked to indicate all reasons (check all that apply) for their virtual visits, 71% reported that they had virtual visits to connect with loved ones who could not visit in-person due to restrictions and 33% had virtual visits to have additional contact with loved ones between their in-person visits. In addition, 71% of respondents reported that they had virtual visits to connect with loved ones who live far away. When asked if they had enough virtual visits to meet their needs, 79% of respondents reported yes, 17% reported sometimes, and 4% reported no.

Residents were asked if there were enough activities for them to do on the weekends and 11% reported yes, 85% reported no, and 4% reported sometimes. When asked if there were enough activities during the week, 57% reported yes, 19% reported no, and 24% reported sometimes.

Autonomy and Control

Respondents were asked about decision making and whether they chose what time they went to bed, clothes they wore and activities in which they participated (Table 3).

Table 3. Choices (% of respondents)

Choice	Yes	Sometimes	No
Bed time	87%	7%	5%
Clothes	95%	2%	4%
Activities	85%	7%	7%

When respondents were asked about their ability to move around alone (not in a wheelchair), 38% of respondents reported yes and 62% reported no. When asked if they were able to move their arms to reach then things that they want, 93% or respondents reported yes, 2% reported sometimes, and 5% reported no. When asked if they could reach the call button by themselves, 98% of respondents reported yes and 2% reported sometimes. When asked if there was a pitcher of water or something to drink where they could reach it by themselves, 94% of respondents reported yes and 6% reported no.

Respondents were asked if they were ever unhappy with the care that they get at the LTC home and the majority (65%) reported no, while 9% reported yes and 25% reported sometimes. While this indicates some residents have dissatisfactions with their care, the majority of respondents also felt they had opportunity to bring forward their concerns. When asked if they feel free to speak up to staff when they are unhappy with their care, 80% reported yes, 8% reported sometimes, and 12% reported no.

Health and Wellness

When respondents were asked to rate how they felt about their life overall (0 being the worst possible and 10 being the best possible), on average they rated their lives at 6.8, a decrease from 8.12 in 2016. When asked how the current pandemic has changed how they feel about their lives, 2% reported a significant negative change, 24% reported some negative change, 65% reported no change, 9% reported some positive change, and no one (0%) reported significant positive change. Residents were asked to indicate how they would rate their overall health. Of the respondents, 11% reported excellent, 31% reported very good, 31% reported good, 18% reported fair, and 9% reported poor. This shows some shifts, with an overall improvement in health rating compared to 2016, when 3% of respondents reported excellent, 26% reported very good, 18% reported good, 26% reported fair, and 26% reported poor.

Residents were asked to indicate how they would rate their overall mood or emotional wellbeing. Of the respondents, 16% reported excellent, 27% reported very good, 35% reported good, 16% reported fair, and 5% reported poor. Residents were asked to indicate how their mood had changed because of the pandemic. Of the respondents, 69% reported

no change, 16% reported a little worse, 11% reported significantly worse, 2% reported a little better, and 2% reported significantly better.

Respondents were also asked to indicate how often they felt worried, happy, bored, and lonely (Table 4). Of respondents, 87% reported being happy often or sometimes, which was an increase from 85% in 2016. However, compared to 2016, a larger percentage of respondents also reported often or sometimes being worried (45% from 26%), bored (44% from 38%), and lonely (67% from 49%).

Table 4. Emotions (% of respondents)

Emotion	Often	Sometimes	Rarely	Never
Happy	67%	20%	9%	4%
Worried	15%	30%	9%	46%
Bored	20%	24%	26%	30%
Lonely	26%	41%	13%	20%

Future Planning

Respondents were asked whether they had a discussion with family or a close friend about what healthcare treatment they wanted or did not want if they became ill and could not speak for themselves. Of the respondents, 55% reported yes, 33% reported no, and 13% reported I don't know/I am unsure. When asked if they ever had a discussion with a healthcare professional or long term care staff about what healthcare treatment they wanted or did not want if they became ill and could not speak for themselves, 45% reported yes, 36% reported no, and 18% reported I don't know/I am unsure. When asked how important they felt it was to have this kind of discussion with a healthcare professional or long term care staff, 4% of respondents reported extremely important, 51% very important, 29% somewhat important, 13% not very important, and 4% not at all important.

Overall

When asked to rate the LTC home, on average, respondents rated the home at 8.02 (range 0-10; 0 being the worst possible and 10 being the best possible). This is a decrease from an overall rating of 8.89 in 2016. When respondents were asked whether they would recommend their LTC home to others, 73% reported definitely yes, 13% reported probably yes, 4% reported probably no, and 11% reported definitely no. This is an overall decrease from 2016, when 80% reported definitely yes, 8% reported probably yes, 3% reported probably no, and 8% reported definitely no.

Residents were also asked if they felt that the protocols and restriction put in place during the pandemic have worked to keep them safe from getting COVID-19. Of the respondents, 73% reported definitely yes, 18% reported probably yes, and 7% reported probably or no, and 2% reported definitely no.

There were very limited comments received from residents at Corner Brook Long Term Care, resulting in only a few common themes. Please refer to the regional report for additional details on common themes from resident comments regarding strengths and concerns.

Strengths and Opportunities for Improvement

Overall results indicate that CBLTC has many strengths, including the overall respect and gentleness of staff with residents, as well as respecting the privacy of residents regarding personal care and visitors. The majority of residents reported feeling free to speak up to staff when they are unhappy with their care. Residents also indicated high satisfaction with aspects of the environment including cleanliness, safety and noise. Also admirable is that Corner Brook Long Term Care has responded to the pandemic without any significant negative impact on residents' experience of care. When asked about the impact of the pandemic on their satisfaction with various aspects of their care, the majority of residents reported no change in their satisfaction with their access to health care staff, access to programs and treatment, or overall care, among other factors.

The survey identified the following areas to explore for opportunities for improvement:

- Meal quality and dining experience;
- Response time to resident requests and buzzers, frequency of resident checks, and frequency of resident repositioning;
- Access to in-person and virtual visitation;
- Availability and choices of activities on the weekends and during the week, with a consideration of access to music and singing;
- Supports to alleviate residents' worry, boredom, and loneliness; and
- Supports for residents to plan their future wants and needs if they become ill and cannot speak for themselves.

Appendix A

Western Health Long Term Care Resident Experience Survey

Long Term Care Resident Experience Survey

As someone living in long term care, we are asking for your help. We are doing a survey in an effort to understand how you view your experience of living in long term care. Any information that you decide to share will help us identify areas for improvement. Western Health will post a summary of the information from all residents who respond on our website at www.westernhealth.nl.ca. This report will be available in September 2021.

If you prefer to complete the survey electronically, it is available here: www.westernhealth.nl.ca/survey.

Your participation in this survey is voluntary and will not affect your health care. We have prepared the survey to be anonymous and will not identify you as a participant. Your participation is greatly appreciated.

If you have any questions about the survey, please call Tracey Wells-Stratton, Regional Manager Research and Evaluation at (709)784-8601, or email her at traceywells@westernhealth.nl.ca.

Thank you for helping to improve long term care in the Western region.

2. Overall, how would you rate this LTC Home? 0 is the worst possible & 10 is the best possible

Mark only one oval.

	0	1	2	3	4	5	6	7	8	9	10	
Worst possible	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Best possible

3. Please rate the following aspects of the LTC home. 0 is the worst possible & 10 is the best possible. Please write in the number would you use to rate the following:

	0	1	2	3	4	5	6	7	8	9	10
How comfortable is the temperature in the LTC home?											<input type="radio"/>
How clean is this LTC home?											<input type="radio"/>
How safe and secure do you feel in this LTC home?											<input type="radio"/>

4. What number would you use to rate the food and dining experience at this LTC Facility? 0 is the worst possible & 10 is the best possible. Please write in the number you would use to rate the following:

	0	1	2	3	4	5	6	7	8	9	10	N/A
Overall, how would you rate the food?												<input type="checkbox"/>
How would you rate the food's taste?												<input type="checkbox"/>
How would you rate the food's temperature?												<input type="checkbox"/>
If you eat in the dining room (or communal area), how would you rate how much you enjoy mealtimes?												<input type="checkbox"/>

5. Now think about all the different kinds of medicine that help with aches or pain. This includes medicine prescribed by a doctor or nurse practitioner, as well as aspirin and tylenol. Do you ever take any medicine to help with aches or pain?

Mark only one oval.

- Yes
- No
- I don't know / I am not sure

- 6. 0 is the worst possible & 10 is the best possible. Please write in the number would you use to rate the following:

	0	1	2	3	4	5	6	7	8	9	10
How well the medicine worked to help with aches or pain											
How well the staff help you when you have pain											

- 7. Do the staff make sure you have enough personal privacy when you dress, take a shower, or bathe?

Mark only one oval.

- Yes
- No
- Sometimes

- 8. Do staff help you with any of the following: to dress, bathe, shower, or go to the toilet?

Mark only one oval.

- Yes
- No

- 9. 0 is the worst possible & 10 is the best possible. What number would you use to rate how gentle the staff are when they are helping you?

Mark only one oval.

	0	1	2	3	4	5	6	7	8	9	10	
Worst possible	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Best possible

10. 0 is the worst possible & 10 is the best possible. Please write in the number would you use to rate the following:

	0 - 1 - 2 - 3 - 4 - 5 - 6 - 7 - 8 - 9 - 10
How respectful the staff are to you?	<input type="checkbox"/>
How well the staff listen to you?	<input type="checkbox"/>
How well the staff explain things in a way that is easy to understand?	<input type="checkbox"/>
The overall care you get from all the staff?	<input type="checkbox"/>

11. How often are you satisfied with the care you receive from the following services/providers?

Mark only one oval per row.

	Never	Sometimes	Usually	Always	N/A
Nursing Staff	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
