## Introduction

A Community Health Assessment (CHA) is a dynamic and on-going process undertaken to identify the strengths and needs of a community, and to establish its health and wellness priorities. CHAs provide information about local areas as well as contribute to a broader understanding of health and wellness in Newfoundland and Labrador. Western Health uses CHAs to help prioritize, plan and act on unmet community needs to improve the health of residents of the Western region.

The CHA process involves:

- Gathering information about health and wellness (facts and opinions)
- Collecting information about health and community resources (assets)
- Evaluating the information to determine strengths, needs, and the community's priorities
- Building partnerships and strategizing together to address health and wellness needs using assets and resources within the community.

In keeping with provincial direction, Western Health followed the *Community Health Assessment Guidelines* - a draft provincial framework for conducting CHAs. This draft guideline was a partnered effort to standardize the CHA process. The partners involved in the original guideline development included the Regional Health Authorities (RHAs), the Newfoundland and Labrador Centre for Health Information (NLCHI), and the Department of Health and Community Services (HCS). The partners agreed on common indicators, methodology, data sources, and the unique and defined geographic regions across the province. For the 2022-23 CHA, partners from Central Health, Eastern Health, and Western Health reviewed the 2019 survey tool and developed a revised document, based on the experience with the previous survey and feedback from the advisors on the Western Health PFCC Steering Committee.

Western Health partnered with the Newfoundland and Labrador Statistics Agency (NLSA) for the 2022-23 CHA survey. The survey tool was adapted slightly to fit with the NLSA's survey platform requirements and to gather regional strategic planning feedback.

## **Methodology**

The Western Health CHA survey was used to collect quantitative and qualitative data from residents of the region about where they find health-related information, where they go for care, satisfaction with health care services, community concerns, satisfaction with health and wellness resources, and health behaviors.

In partnership with the NLSA, the CHA survey was distributed in July 2022 to 9,263 selected individuals, age 16 and over, who resided in the Western region. Survey distribution was calculated using a stratified random sampling method based on the populations within each of Western Health's seven Health Neighbourhood geographic areas, stratified across age and gender demographics. The sample size was based on an anticipated 30% completion rate to obtain a 95% confidence level,  $\pm 7\%$ . Data collection ended on September 9, 2022.

A robust communication plan was developed by Western Health to disseminate survey information and promote uptake among those who were selected for the survey. A survey implementation team was established and the team received frequent response rate updates for the region and each Health Neighbourhood. The implementation team worked together to ensure ongoing promotion across the region. To encourage survey completion, Western Health's Wellness Facilitators and community partners were provided promotional materials and asked to share within their networks and on social media. In addition, Western Health shared survey promotions on social media multiple times and a media release was issued. To ensure all residents were able to complete the survey, phone numbers for both the NLSA and the Wellness Facilitators were provided in the survey letter so that respondents could ask questions and/or request paper copies of the survey. The NLSA also completed telephone reminder calls, during which offers were made to email the survey link or mail out a paper copy of the survey with a return envelope.

Following the survey completion deadline, the survey data was compiled by the NLSA and the results tables, including coded themes from 'other' and open-ended responses, were provided to Western Health. The following results section highlights the main themes and areas of interest for the Bonne Bay Health Neighbourhood and the Port Saunders Health Neighbourhood, as identified by the CHA survey. The responses for these two Health Neighbourhoods were combined in order to ensure the response volume met the minimum response goal needed to provide confidence in the results.

Unless otherwise noted, questions do not include missing data. Refer to Appendix A to view full detailed CHA results tables. A copy of the CHA survey can be found in Appendix B.

## Results

### Demographics

A total of 248 surveys were completed throughout the Bonne Bay and Port Saunders Health Neighbourhoods. The Bonne Bay Health Neighbourhood included such communities as Rocky Harbour, Parsons Pond, Norris Point, Woody Point, Trout River, Cow Head, and Parsons Pond. The Port Saunders Health Neighbourhood includes such communities as Port Saunders, Port au Choix, and River of Ponds. The majority of survey respondents for the Port Saunders area were from the community of Port Saunders (20.56%), while the majority of respondents from the Bonne Bay Area were from Rocky Harbour (9.68%). See chart below for details.

The following is a profile of survey respondents from the Bonne Bay and Port Saunders Health Neighbourhoods. The majority of survey respondents:

- Lived in their community for more than 20 years (67.3%)
- Were in the 55-64 age group (28.2%), followed closely by the 65-74 age group (25.0%)

- Identify as woman (55.2%)
- Reported their highest level of education completed as completed a technical, vocational or community college program (29.4%)
- Were retired from paid work (32.3%), followed closely by employed full time (including self-employed or on a work training program) (27.0%)

### ***Primary Care Provider***

The first section of the CHA survey focused on questions related to access to primary care providers (family/primary care doctor or nurse practitioner in a community-based office or Western Health clinic) and level of satisfaction with the quality of services received.

According to the survey results, when respondents are looking for health-related information, the majority:

1. Ask a family doctor/nurse practitioner (70.2%)
2. Ask a pharmacist (50.0%)
3. Call/visit a hospital/clinic (48.0%)

The last time respondents needed care for a minor health problem (e.g., fever or unexplained rash), the majority went to:

1. Family/primary care doctor/nurse practitioner (50.0%)
2. Hospital Emergency Department (12.1%)
3. Pharmacist (6.9%)

\*In addition, 10.5% chose not to seek treatment.

When asked how long it took to receive treatment for their last minor health problem, 59.3% reported that they received treatment the same day, while 9.1% reported that they received treatment the next day. Additionally, 23.4% reported that it took two days or more to receive treatment and 8.1% reported that they never received treatment or left before receiving treatment.

Respondents were asked if they currently have a family/primary care doctor or nurse practitioner and their level of satisfaction with their provider. Results indicate:

- 80.2% have a family doctor or nurse practitioner. Of the 80.2%,

- 80.9% reported being satisfied or very satisfied with their family/primary care doctor or nurse practitioner
- 8.0% reported being dissatisfied or very dissatisfied with their family/primary care doctor or nurse practitioner and indicated the following reasons most commonly:
  - Unable to easily contact the clinic/office (68.8%)
  - Wait list for an appointment was too long (56.3%)
  - Health-care appointment(s) were rushed or limited to one issue per visit (31.3%)

### ***Health Care***

The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g. pharmacy, private specialist clinics, vision/dental clinics). Survey respondents were asked about access to the health care system and satisfaction with the quality of services received.

When asked about accessing health care services within the last 12 months, the majority of participants (74.6%) indicated they were able to access the required health services, while 25.4% of respondents indicated that there were health services that they required and were unable to access. The following are the top three reasons respondents were unable to access a required health service:

1. Wait time for service was too long (54.0%)
2. Service not available (25.4%)
3. Too far to travel (20.6%)

According to survey results, the majority of respondents (62.5%) were satisfied or very satisfied with the health care services they have used in the past 12 months, while 14.1% of respondents were dissatisfied or very dissatisfied. The respondents that indicated they were dissatisfied or very dissatisfied with the health care services they used in the past 12 months, were asked to indicate the reasons why. The following are the top three reasons the respondents were dissatisfied with the services received:

1. Wait list for an appointment was too long (62.9%)
2. Unable to easily contact the clinic/office (54.3%)
3. You did not have trust and confidence in your health-care provider(s) (37.1%)

## *Community Health and Wellness*

Survey respondents were asked questions about the health and wellness of their community as well as their satisfaction with the resources and services available within their community. Respondents were provided a list of various areas/issues and were asked to indicate which ones they were most concerned about in their community. The most commonly selected areas/issues were:

1. Cost of living (69.0%)
2. Road quality (67.7%)
3. Mental health of community residents (44.4%)
4. Drug/alcohol impaired driving of any vehicle (e.g., car, motorcycle, ATV, snowmobile, etc.) (41.1%)
5. Food security (access to sufficient, affordable, nutritious food) (41.1%)

Of the issues/areas that respondents selected, they were then asked to rank their top three areas/issues they are most concerned about. The top five ranked answers were:

1. Cost of living (51.7%)
2. Road quality (38.0%)
3. Emergency service (26.1%)
4. Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.) (19.7%)
5. Mental health of community residents (19.2%)

There are many different groups and resources that aim to improve the health and wellness of a community. These include Western Health, private health clinics, churches, schools, town councils, resource centers, Community Advisory Committees, recreation spaces/gyms, and other community groups. Respondents were asked to rate their level of satisfaction with the resources available to help deal with the health and wellness challenges in their communities. The majority of respondents (38.7%) were neither satisfied nor dissatisfied with the resources available, while 33.4% were very satisfied or satisfied, and 27.9% were dissatisfied or very dissatisfied. Respondents who indicated they were either dissatisfied or very dissatisfied were asked to explain which aspects of the health and wellness resources they are dissatisfied with. The following were the most common responses:

1. Community resources/supports are not available (65.2%)
2. Community resources/supports are not effective (37.7%)

3. Hours of service(s) are inconvenient (20.3%)

### ***Health Status***

The following section of the CHA survey asked questions to understand the health of the population who completed the survey. The majority of respondents reported that their physical health was excellent or very good/good (5.6% and 68.1% respectively). The majority of respondents also reported that their mental health was excellent or very good/good (13.7% and 63.3% respectively).

Survey respondents were asked what they would like to do to improve their physical and/or mental health and what was making it difficult to make the changes they identified.

The top three things individuals would like to do to improve the physical and/or mental health were:

1. Eat healthier/eat more fruits and vegetables (58.9%)
2. Start/increase exercise, sports or physical activity (52.4%)
3. Reduce stress (43.1%)

While 27.5% of respondents indicated that there was nothing in particular making it difficult to make these changes, the following were the top three barriers identified by respondents:

1. Community resources/supports are not available (28.4%)
2. Not enough time available (25.7%)
3. Cost is too high (22.9%)

### ***Health Care Planning***

Western Health is currently in the process of developing its Strategic Plan for 2023-2026. The plan will outline the main priorities and focus areas for Western Health over the next three years. To seek public feedback on potential priorities of the strategic plan, the CHA survey asked respondents to provide feedback on Western Health's vision, values, and priorities.

Respondents were provided an explanation of vision statements and an overview of Western Health's current vision (Our People, Our Communities – Healthy Together). Respondents were asked if Western Health should keep the current vision or make changes and the majority (81.9%) identified that the

organization should keep the current vision statement. The 18.1% who recommended a change were asked to suggest changes. The following were the most common suggestions:

1. Healthcare (48.9%)
2. Follow through on vision statement (i.e., taking action, making changes) (8.9%)
3. Reduce wait times/wait lists for appointments/tests/procedures/referrals, etc. (6.7%)

Respondents were provided an explanation of core values and an outline of Western Health's current values (accountability, care, collaboration, excellence, respect, and transparency). They were then provided with detailed list of various values and were asked to indicate which ones they thought should be included as Western Health's core values. The most commonly selected values were:

1. Care (64.5%)
2. Accountability (63.7%)
3. Compassion (kind, caring, empathy) (45.2%)
4. Communication (41.1%)
5. Respect (39.5%)

When respondents were asked to report the one priority area that Western Health should focus on over the next three years to improve the care and services delivered, the most common responses were:

1. Primary care access and wait time reduction (easier and faster access to services such as family/primary care doctors, nurse practitioners, and collaborative care clinics) (37.9%)
2. Aging population (improve supports and services for seniors) (23.8%)
3. Recruitment and retention (improve staffing through actions such as hiring incentives, additional scheduling options and other methods) (18.5%)

### ***Concluding Remarks***

To conclude the survey, respondents were asked if there was anything else they would like to add. From the 27.8% of respondents who provided an additional comment, the most common responses were:

1. Need more doctors/nurses/healthcare professionals/increased availability/access to healthcare (49.3%)
2. Reduce wait lists/wait times for appointments/tests/procedures/referrals, etc. (10.1%)

3. Focus on recruitment/retention for skilled healthcare professionals (e.g., offer higher wages, more incentives, etc.) (8.7%)
4. Patients need more respect/compassion, better treatment/communication from doctors/nurses, etc. (7.2%)
5. More awareness/education/collaboration with people/communities (e.g., promoting active living, eating healthier, etc.) (5.8%)
6. Better working conditions for doctors/nurses/health professionals (e.g., more time off, less overtime, etc.) (1.4%)
7. More resources/supports available for seniors (e.g., access to home care, more personal care homes, etc.) (1.4%)
8. More focus on mental health (e.g., providing adequate resources/support for those with mental health issues) (1.4%)

Following the demographics section, respondents were provided with a final opportunity to share any further comments related to the survey or its content. The most common responses were:

1. Need more doctors/nurses/healthcare professionals/increased access to healthcare (4.4%)
2. Reduce wait lists/wait times for appointments/tests/procedures/referrals, etc. (0.8%)
3. Find more efficiencies in the healthcare system (with respect to cost, resources, management, etc.) (0.8%)
4. Follow through on recommendations/feedback in the survey (i.e., taking action, making changes) (0.8%)
5. Glad to have participated in the survey, having the opportunity to give feedback, etc. (0.8%)

\*An additional 88.7% of respondents did not provide a comment.

## **Successes and Limitations**

The CHA survey implementation team, utilizing the stratified randomized sampling method with supplemental local promotional campaigns, experienced overall success in uptake of the survey. Regionally, there was an approximately 15% decrease in overall survey completion from the previous CHA survey cycle implemented in 2019. For the Bonne Bay and Port Saunders Health Neighbourhoods combined there was no decrease overall with 248 respondents in both 2019 & 2022. However, there was a change in distribution of the respondents throughout the health neighbourhoods. As a result, the two health neighbourhoods had to be combined in order to reach minimum confidence rating.

The survey method did see improvements in the representative sample. The survey method was successful in addressing concerns about a disproportionately large percentage of females completing the survey in prior survey cycles. Respondents in the 2022 survey cycle were also more closely aligned in comparison to the overall population of the Western region in regards to education level and employment status. See the Regional Summary Report for additional details.

The initial launch for the survey cycle was delayed from Spring to Summer due to delays in the process to finalize the survey in the new platform, as well as developing the survey sample and mail out process. The promotional campaign was developed and intended to be released prior to the initial mail out of the surveys. However, due to the delays with the mailing processes and a communication issue with the NLSA mailroom, the surveys were received at some homes prior to the launch of the promotional campaign. As these issues have now been addressed, it is anticipated that these process delays and misalignment of the timing for promotions should not be concerns for subsequent survey cycles.

## Conclusion

The CHA survey is an important step in determining the needs and resources of residents in the Western region. The survey included qualitative and quantitative questions, providing residents with an opportunity to express their views of the health and community services offered in the region. Overall survey findings for the Bonne Bay and Port Saunders Health Neighbourhoods indicated that residents have concerns related to cost of living, road quality, emergency services, chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.), mental health of community residents, drug/alcohol impaired driving of any vehicle (e.g., car, motorcycle, ATV, snowmobile, etc.), and food security (access to sufficient, affordable, nutritious food). Additional findings, including the themes identified from the comments indicated respondents were also concerned about the need for more doctors/healthcare professionals, increased availability and access to health care, reducing wait lists and wait times for appointments/tests/procedures/referrals, etc., focus on recruitment/retention for skilled healthcare professionals (e.g., offer higher wages, more incentives, etc.), and finding more efficiencies in the healthcare system (with respect to cost, resources, management, etc.). The survey also demonstrated positive feedback including 80.2% of respondents currently have a family/primary care doctor or nurse practitioner and 80.9% were very satisfied or satisfied with the services provided by their primary care provider.

Data obtained from the CHA for the region and Health Neighbourhoods will support planning at the local Health Neighbourhood level, as well as organizational strategic, branch, and program planning. Survey results will be used by service providers and programs, Community Advisory Committees, and primary health care teams to determine key priorities and to inform planning. Results will also be shared with relevant community partners to help inform their planning and service delivery processes.

**Asked to all respondents**

**Appendix B:**  
**Western Health Community Health Assessment Survey**

WESTERN HEALTH  
COMMUNITY HEALTH ASSESSMENT 2022

PURPOSE

Western Health, in partnership with the Newfoundland and Labrador Statistics Agency (NLSA), is doing a survey to help us understand the community health needs in the Western Health region.

CONFIDENTIALITY

The information is being collected and protected under the authority of the [Access to Information and Protection of Privacy Act 2015](#) (ATIPPA, 2015) of the Province of Newfoundland and Labrador. Information collected will be shared with Western Health for the purposes of assessing specific community health needs. Please be assured that your answers will be kept strictly confidential, and any results published from this survey will reported collectively. No identifying information will be published. The survey will take approximately 15 minutes to complete.

If you have any questions concerning privacy or confidentiality, have difficulty accessing or completing the survey, or would like to be sent an electronic link or paper copy, you can contact the Newfoundland and Labrador Statistics Agency by email at [NLSASurveys@gov.nl.ca](mailto:NLSASurveys@gov.nl.ca) or by telephone, toll-free, at 1-888-461-5244. Please note that if you call the toll-free number, you will be asked to leave a message. Western Health's Wellness Facilitators are also available to answer any other questions you may have about the survey:

- Port aux Basques, Burgeo, and Stephenville areas: 709-649-7921
- Corner Brook, Humber Valley and White Bay areas: 709-640-1874
- Bonne Bay and Port Saunders areas: 709-458-2381

INSTRUCTIONS

For the purposes of navigating through the survey, the arrow pointing to the right will take you forward to the survey's next page, and the arrow pointing to the left will return you to the survey's previous page.

While completing the survey, you may exit at any time by closing your internet browser. When you are ready to resume, simply use the link and Survey Access Code provided to again access the survey. Your previous responses will be saved, and you will resume where you left off. However, once the final question has been answered and the responses submitted, the survey will no longer be accessible. If this occurs, and you would like to change one or more of your responses, please contact the NLSA at [NLSASurveys@gov.nl.ca](mailto:NLSASurveys@gov.nl.ca).

*[Please proceed to the next page to begin the survey.]*

**SECTION A – PRIMARY CARE PROVIDER**

AR1. The following questions ask about your access to a primary care provider (family doctor or nurse practitioner in a community-based office or Western Health clinic) and your satisfaction with the quality of services received. Of note: this section applies to both virtual and in-person care. *[Please proceed to the next page.]*

A1. If you needed to find health-related information for yourself or someone else today, how would you get that information? (Select all that apply)

- 1  Ask a family doctor
- 2  Ask a nurse practitioner
- 3  Ask a pharmacist
- 4  Ask a community or public health nurse
- 5  Call/visit a hospital/clinic
- 6  Search the internet (e.g., WebMD, Google search)
- 7  Western Health website
- 8  Social media (e.g., Facebook, Twitter)
- 9  Use 811 HealthLine
- 10  Contact a not-for-profit agency (e.g., Cancer Society, Mental Health Association) or a community group, church group, or library
- 11  Ask a friend or family member
- 12  Ask another health professional (please specify): \_\_\_\_\_

A2. The last time you needed care for a minor health problem (e.g., fever or unexplained rash), where did you go? (Select one response)

- 1  Family/primary care doctor or nurse practitioner
- 2  Private-pay physician or nurse practitioner
- 3  Walk-in clinic
- 4  Community Based Medical Clinic
- 5  Hospital emergency department
- 6  811 HealthLine
- 7  Pharmacist
- 8  I do not have a place to get care for a minor health problem *[Go to A4]*
- 9  I chose not to seek treatment *[Go to A4]*
- 97  Other (please specify): \_\_\_\_\_

A3. The **last time** you needed care for a minor health problem (e.g., fever or unexplained rash), how long did it take you to receive treatment? (Select one response only)

- 1  Received treatment the same day
- 2  Received treatment the next day
- 3  Took two days or more to receive treatment
- 4  Never received treatment/left before receiving treatment

A4. Do you currently have a family/primary care doctor or nurse practitioner?

- 1  Yes
- 2  No [Go to BR1]

A5. **Overall**, how satisfied are you with the services provided by your family/primary care doctor or nurse practitioner?

- 1  Very satisfied [Go to BR1]
- 2  Satisfied [Go to BR1]
- 3  Neither satisfied nor dissatisfied [Go to BR1]
- 4  Dissatisfied
- 5  Very dissatisfied

A6. Why are you **dissatisfied** with the services provided by your family/primary care doctor or nurse practitioner? (Select all that apply)

- 1  Unable to easily contact the clinic/office
- 2  Virtual visit when in-person visit preferred
- 3  Wait list for an appointment was too long
- 4  Wait time in the clinic/office or window for virtual care visit was too long
- 5  Too far to travel
- 6  Hours of service were inconvenient
- 7  Communication barrier
- 8  Equipment quality was poor

A6. (cont.)

- 9 You do not have trust and confidence in your health care provider(s)
- 10 Health-care provider(s) did not give you a chance to ask questions
- 11 Health care provider(s) did not treat you with respect
- 12 Health care provider(s) did not explain things in a way that is easy to understand
- 13 Health care provider(s) did not involve you in decisions about your care
- 14 Health care appointment(s) were rushed or limited to one issue per visit
- 97 Other (please specify): \_\_\_\_\_

## SECTION B – HEALTHCARE

BR1. The health care system provides a full continuum of health and community services, including public health, long-term care, acute (hospital) care, and private health care providers (e.g. pharmacy, private specialist clinics, vision/dental clinics). The following questions ask about your access to the health-care system and your satisfaction with the quality of services received (please DO NOT include Family Doctor/Nurse Practitioner services, as these were indicated previously). *[Please proceed to the next page.]*

B1. Sometimes we require health-care services but are unable to access them. Have you required any health-care service that you were unable to access during the past 12 months?

- 1 Yes
- 2 No [Go to B3]

B2. Why were you unable to access services that you required during the past 12 months? (Select all that apply)

- |   |   |
|---|---|
| <input type="radio"/> 1 Wait time for service was too long                                    | <input type="radio"/> 7 Unable to get a referral                            |
| <input type="radio"/> 2 Cost of service was too high  | <input type="radio"/> 8 Unable to contact the service                       |
| <input type="radio"/> 3 Transportation issues   | <input type="radio"/> 9 Communication barrier                               |
| <input type="radio"/> 4 Too far to travel   | <input type="radio"/> 10 Did not know the service was available at the time |
| <input type="radio"/> 5 Unable to leave the house due to health problems                      | <input type="radio"/> 11 Service not available                              |
| <input type="radio"/> 6 Unable to access the services during scheduled time /hours of service | <input type="radio"/> 97 Other (please specify): _____                      |

B3. Overall, how satisfied were you with the health-care services that you did use during the past 12 months?

- 1  Very satisfied [Go to CR1]
- 2  Satisfied [Go to CR1]
- 3  Neither satisfied nor dissatisfied [Go to CR1]
- 4  Dissatisfied
- 5  Very dissatisfied
- 6  I have not used any health-care services in the past 12 months [Go to CR1]

B4. Why were you dissatisfied with the health-care services that you did use during the past 12 months? (Select all that apply)

- 1  Unable to easily contact the clinic/office
- 2  Virtual visit when in-person visit preferred
- 3  Wait list for an appointment was too long
- 4  Wait time in the clinic/office or window for virtual care visit was too long
- 5  Too far to travel
- 6  Hours of service were inconvenient
- 7  Cost of service was too high
- 8  Communication barrier
- 9  Equipment quality was poor
- 10  You did not have trust and confidence in your health-care provider(s)
- 11  Health-care provider(s) did not give you a chance to ask questions
- 12  Health-care provider(s) did not treat you with respect
- 13  Health-care provider(s) did not explain things in a way that was easy to understand
- 14  Health-care provider(s) did not involve you in decisions about your care
- 15  Health care appointment(s) were rushed or limited to one issue per visit
- 97  Other (please specify): \_\_\_\_\_

## SECTION C – COMMUNITY HEALTH AND WELLNESS

CR1. The following questions ask about the health and wellness of your community, as well as your satisfaction with the resources and services available within your community. *[Please proceed to the next page.]*

C1. Please select the areas/issues that you are concerned about in your community. (Select all that apply)

- 1  Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2  Bullying
- 3  Childcare (including affordability, lack of accessibility)
- 4  Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5  Crime and violence
- 6  Cost of living
- 7  Clean water supply
- 8  Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)
- 9  Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)
- 10  Education system
- 11  Emergency services
- 12  Environmental issues (e.g., contaminants in the air, water and soil)
- 13  Food security (access to sufficient, affordable, nutritious food)
- 14  Homelessness (including couch surfing)
- 15  Housing conditions
- 16  Low literacy levels
- 17  Mental health of community residents
- 18  Outmigration
- 19  Physical health of community residents
- 20  Poverty
- 21  Public transportation (including affordability, lack of accessibility)
- 22  Recreation programs/spaces
- 23  Resources for people with disabilities (e.g., accessible buildings)
- 24  Road quality
- 25  Seniors' resources/programs
- 26  Sexual health (including unplanned pregnancy, Sexually Transmitted Infections)

C1. (cont.)

- 27  Social isolation and lack of community involvement
- 28  Suicide
- 29  Tobacco use/smoking/vaping
- 30  Unemployment
- 31  Violence in the home (e.g., child abuse/neglect, domestic)
- 32  Working conditions (e.g., risks for injury on the job)
- 97  Other (please specify): \_\_\_\_\_
- 33  I am not concerned about the health and wellness of my community [Exclusive Response] [Go to C3]

[Programming note: if the respondent only chooses one option in C1, they will skip to C3]

C2A. (If number of options chosen in C1 $\geq$ 3) Of the issues selected in the previous question, please rank the 3 that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 3 issues you are most concerned about. Next, arrange the 3 issues in the box on the right in order so that the issue you are most concerned about is first, the one of next concern is second and the one of least concern is third.

C2B. (If number of options chosen in C1=2) Next, we want you to please rank the 2 issues from the previous question that you are most concerned about.

One at a time, click and drag an issue from the left column and drop it in the empty box on the right until the box contains the 2 issues you are most concerned about. Next, arrange the 2 issues in the box on the right in order so that the issue you are most concerned about is first and the one of lesser concern is second.

- 1  Addictions and substance use (e.g., alcohol and/or drug misuse and abuse, gambling)
- 2  Bullying
- 3  Childcare (including affordability, lack of accessibility)
- 4  Chronic diseases (e.g., prevalence of diabetes, high blood pressure, cancer, etc.)
- 5  Crime and violence
- 6  Cost of living
- 7  Clean water supply
- 8  Distracted driving of any vehicle (e.g. texting or talking on cell phone while driving car, motorcycle, ATV, snowmobile, etc.)

9  **Drug/alcohol impaired driving of any vehicle (e.g. car, motorcycle, ATV, snowmobile, etc.)**

10  **Education system**

C2A/C2B. (cont.)

11  **Emergency services**

12  **Environmental issues (e.g., contaminants in the air, water and soil)**

13  **Food security (access to sufficient, affordable, nutritious food)**

14  **Homelessness (including couch surfing)**

15  **Housing conditions**

16  **Low literacy levels**

17  **Mental health of community residents**

18  **Outmigration**

19  **Physical health of community residents**

20  **Poverty**

21  **Public transportation (including affordability, lack of accessibility)**

22  **Recreation programs/spaces**

23  **Resources for people with disabilities (e.g., accessible buildings)**

24  **Road quality**

25  **Seniors' resources/programs**

26  **Sexual health (including unplanned pregnancy, Sexually Transmitted Infections)**

27  **Social isolation and lack of community involvement**

28  **Suicide**

29  **Tobacco use/smoking/vaping**

30  **Unemployment**

31  **Violence in the home (e.g., child abuse/neglect, domestic)**

32  **Working conditions (e.g., risks for injury on the job)**

97  **Other (please specify): \_\_\_\_\_**

C3. There are many different groups and resources that aim to improve the health and wellness of a community. These include Western Health/Regional Health Authority, private health clinics (e.g., pharmacy, private specialist clinics, vision/dental clinics), churches, school town councils, resource centres, community advisory committees, recreation spaces/gyms, and other community groups.

Overall, how satisfied are you with the resources available to help deal with the health and wellness challenges in your community?

- 1  Very satisfied [Go to DR1]
- 2  Satisfied [Go to DR1]
- 3  Neither satisfied nor dissatisfied [Go to DR1]
- 4  Dissatisfied
- 5  Very dissatisfied

C4. Why are you dissatisfied with the resources available? (Select all that apply)

- 1  Community resources/supports are not available
- 2  Community resources/supports are not effective
- 3  Hours of service(s) are inconvenient
- 4  Cost is too high
- 7  Other (please specify): \_\_\_\_\_

## SECTION D – HEALTH STATUS

DR1. This section will help us describe the health of the population who completed the survey.  
[Please proceed to the next page.] [Programming note: non-response will be allowed for questions in this section.]

D1. In general, would you say your personal physical health is...?

- 1  Excellent
- 2  Very good
- 3  Good
- 4  Fair
- 5  Poor

**D2. In general, would you say your personal mental health is...?**

- 1  Excellent                      4  Fair  
2  Very good                      5  Poor  
3  Good

**D3. What would you like to do to improve your personal physical or mental health? (Select all that apply)**

- 1  Start/increase exercise, sports or physical activity  
2  Eat healthier/eat more fruits and vegetables  
3  Drink less alcohol  
4  Reduce smoking (not including cannabis)  
5  Reduce vaping (not including cannabis)  
6  Reduce cannabis use (in any form)  
7  Reduce illicit drug use  
8  Reduce prescription drug misuse  
9  Gamble less  
10  Reduce stress  
11  Enhance self-care  
12  Reduce screen time (computer, Smartphone, TV)  
13  Get the flu shot  
14  Seek physical or mental health treatment  
15  Get more sleep  
16  Connect more with family, friends or community  
17  Other (please specify): \_\_\_\_\_  
17  There is nothing I would like to do [Exclusive Response] [Go to ER1]

**D4. What is making it difficult for you to make the change(s) you identified in the previous question? (Select all that apply)**

- 1  Community resources/supports are not available  
2  Community resources/supports are not effective  
3  Not enough time available  
4  Medical condition/injury  
5  Lack of childcare  
6  Cost is too high

7  Other (please specify): \_\_\_\_\_

8  Nothing in particular [Exclusive Response]

## SECTION E – HEALTH CARE PLANNING

ER1. Western Health is in the process of developing its Strategic Plan for 2023-2026. The plan will outline the main priorities and focus areas for Western Health for the next three years. We would appreciate your feedback on Western Health's vision, values, and priorities. [Please proceed to the next page.]

E1. The purpose of developing a vision statement is to help people think ahead to future possibilities, rather than being limited by the current reality. It is our future desire, not our current situation. The current vision statement of Western Health is: Our People, Our Communities - Healthy Together

In your opinion, should Western Health make any changes to its vision statement?

1  No, keep the current vision

2  Yes, I suggest the following changes: \_\_\_\_\_

E2. Western Health's core values set the standards of conduct that are considered important and guide the behavior of all individuals (physicians, employees & volunteers) in the organization and influence decision making. Values are at the heart of the organizational culture and should be reflected throughout the organization.

Western Health's current core values are:

1. Accountability
2. Care
3. Collaboration
4. Excellence
5. Respect
6. Transparency

Western Health is reviewing its core values. What do you think Western Health's core values should be? (Select up to five)

1  Accountability

2  Advocacy

3  Bilingual Communication

4  Care

5  Collaboration

6  Communication

7  Community-focused

8  Compassion (kind, caring, empathy)

9  Dedication

10  Dignity

12  Diversity

13  Empowerment

14  Engagement

15  Equity

16  Excellence

17  Harm Reduction

18  Inclusive

19  Innovation (progressive)

20  Person-and Family Centred (client/patient/resident focused)

21  Privacy

22  Quality

23  Respect

24  Teamwork

25  Transparency/Openness

E3. Western Health's Strategic Plan for 2023-2026 will outline the main priorities for Western Health for the next three years. In its current plan, there are three priority areas: Our People, Quality & Safety, and Innovation.

During our recent Community Engagement Sessions with each of the seven Health Neighbourhoods, community partners recommended the following areas as priorities for improvement.

Please select the priority that, in your opinion, is the one priority area that Western Health should focus on over the next three years to improve the care and services we deliver:

- 1  Aging population (improve supports and services for seniors)
- 2  Continuity of care (improve collaboration and information sharing across services)
- 3  Mental Health & Addiction Services access and wait time reduction (easier and faster access)
- 4  Prevention and healthy living (improve health practices and skills such as physical activity, healthy eating, decision-making, coping, relaxation, and sleep)
- 5  Primary Care access and wait time reduction (easier and faster access to services such as family/primary care doctors, nurse practitioners, and collaborative care clinics)
- 6  Recruitment and retention (improve staffing through actions such as hiring incentives, additional scheduling options, and other methods)
- 7  Service navigation supports (enhance services to better direct patients and clients in finding services or contact information)
- 8  Social determinants of health (address concerns such as housing, food security, poverty/low income, physical environments)

E4. Is there anything else that you would like to add about the health of the population and the health care services provided in the Western Health region?

- 1  Yes (enter comments): \_\_\_\_\_
- 2  No

E5. How did you hear about this survey? (Select all that apply)

- 1  Community group/organization
- 2  Western Health event
- 3  Western Health staff member or volunteer
- 4  Western Health website
- 5  Received a letter through the mail
- 6  Facebook
- 7  Family/friend/colleague
- 8  News outlet (e.g., vocm.com; ntv.ca; cbc.ca)
- 9  Printed sign/business card
- 10  Radio
- 11  Television screen at a Western Health facility
- 97  Twitter
- 97  Other (please specify): \_\_\_\_\_

**SECTION F – DEMOGRAPHICS**

FR1. This section will help us describe the population who completed the survey. Questions are being asked for research and statistical purposes only. Please be assured that your answers will be kept strictly confidential.

*[Please proceed to the next page.] [Programming note: non-response will be allowed for questions in this section.]*

F1. How long have you lived in your current community?

- 1 Less than 2 years
- 2 2 - 5 years
- 3 6 - 10 years
- 4 11 - 20 years
- 5 More than 20 years

F2. Please indicate your age.

- |                               |                               |
|-------------------------------|-------------------------------|
| <input type="radio"/> 1 16-24 | <input type="radio"/> 5 55-64 |
| <input type="radio"/> 2 25-34 | <input type="radio"/> 6 65-74 |
| <input type="radio"/> 3 35-44 | <input type="radio"/> 7 75-84 |
| <input type="radio"/> 4 45-54 | <input type="radio"/> 8 85+   |

F3. What is your gender identity? (Select all that apply)

- 1 Man
- 2 Woman
- 3 Transgender
- 4 Two Spirit
- 5 Non-Binary
- 6 Agender
- 7 Genderqueer
- 8 Genderfluid
- 9 Gender nonconforming
- 97 Other identity (please specify): \_\_\_\_\_

F4. What is the highest level of education you have completed? (Select one response only)

- 1  Some secondary school or high school
- 2  Completed secondary school or high school
- 3  Started university or college education but did not complete it
- 4  Completed a technical, vocational or community college program
- 5  Completed a bachelor's degree
- 6  Completed a graduate or professional degree

F5. Which of the following describes your employment status? (Select one response only)

- 1  Employed full time (including self-employed or on a work training program)
- 2  Employed part time (including self-employed or on a work training program)
- 3  Seasonal worker
- 4  Commuting/rotational worker
- 5  Student
- 6  Unemployed and looking for work
- 7  Unemployed and not looking for work
- 8  Unable to work due to a long-term sickness or disability
- 9  Looking after my home/family
- 10  Retired from paid work

**SECTION G – RESPONDENT FEEDBACK**

G1. Do you have any further comments related to this survey or its content?

- 1  Yes (enter comments): \_\_\_\_\_
- 2  No

**Please proceed to the next page to submit your responses and exit the survey.**

Thank you for participating.

We appreciate the time you took to complete this survey.

The results will be available on the Western Health website in the fall of 2022.

*[Respondents will be re-directed to: <https://westernhealth.nl.ca/>]*
